

## INDEX

Alert Notices	37	Nova Search Program	67
asterisms	9, 52	novae	21
atlas	5, 36	observations, how to make	9
Bulletin	37–38	observations, how to submit	39–44
cataclysmic variables	21–23	observations, recording	15
CCD Observing Program	65	observer initials	42
chart scales	6	observing equipment	3–5
charts	5–8	orientation of charts	11–12
charts, orientation of	11–12	PC Obs (data-entry program)	40–41
comparison stars	9–10	PEP Observing Program	66
constellation names	19	phase diagram	20
data-entry software	41	pulsating variables	20–21
designation	17–18	Purkinje effect	15
eclipsing binaries	23	report form, blank	45–46
Eclipsing Binary Observing Program	66	report form, comment codes	47
eruptive variables	21	report form, how to complete	41–44
eyepieces	4	reporting observations	39–43
fainter-than	15, 43	rotating stars	23
field of view	4	RR Lyrae stars	21
Greenwich Mean Time (GMT)	25, 26	RR Lyrae Observing Program	66
Greenwich Mean Astronomical Time (GMAT)	25, 26	seasonal gap	2
interpolation	10	setting circles	9
irregular variables	21	SID (Sudden Ionospheric Disturbance)	67
Julian date, how to compute	25	Solar Observing Program	66–67
Julian date, sample calculations	26	star charts	5–8
Julian date, table for 1996–2025	31	star hop	14, 49
Julian date, table of decimals	29, 33	sunspots	66
key star	9	Supernova Search Program	67
light curve, definition	20	supernovae	21
light curve, examples	20–23	time zone chart	28
light curves, long term	57–63	Universal time (UT or UTC)	26
limiting magnitude	13–14	variable star names	17
magnitude	13	variable stars, types of	20–23
MyNewsFlash	37	WebObs	39–40
