Loop for Gyrator III

Notch ends of arm for wire loop

Gyrotron cross-arm, 3 cm square, 75 cm long.
The loop has two windings:
The primary 140 turns of wire .25 mm tuned with capacitor 1500 pF for 20 KHz approximately.
The secondary 18/22 turns of wire .25 mm.

The secondary winding is coupled on inductive way to Gyrator III with cable TV from 75 ohm.
